

## Introduction and overview of ISO-certification - why work with a certified company like BRANDR

In this page we will explain briefly what the different standards are, and what they can be used for

At BRANDR we are operating with two different ISO-standards. This means we have implemented and work according to quality management system in compliance with demands of the standards.

THE TWO STANDARDS:

**ISO 9001** - Quality management & **ISO 14001** - Environmental management

### Info about the standards

#### **DS/EN ISO 9001:2015 - Quality Management**

as the standard is named is focused This standard is based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach and continual improvement For more info about ISO 9001 press [here](#)

#### **DS/EN ISO 14001:2015 - Environmental Management**

as the standard is named, sets out the criteria for an environmental management system and can be certified to. It maps out a framework that a company or organization can follow to set up an effective environmental management system. For more info about ISO 14001 press [here](#)

- Legal and product compliance

If you have any questions regarding our management systems and our work to continually improve our processes and minimize our risks and environmental footprint please to not hesitate to contact us.

#### **What does that mean?**

This means that we at BRANDR does the following and more.

- Yearly third-party revision by an accredited third-party certification body.
- Has a risk evaluation and management of identified risks.
- Has a procedure for handling processes in our organization?

Examples of procedures within BRANDR

- Communications including receiving orders
- Product safety
- Handling deviations and complaints
- Costumers focus and satisfaction

This means that BRANDR does the following and more.

- Commit to continual improvement in an environmental perspective.
- Set goals and evaluates yearly
- Has identified relevant environmental risks and effects and continuously work to improve our presence in the world.
- Works to minimize the environmental footprint of our product
